

Near Patient Sharps Disposal™ & HTM 07-01

How does it work?

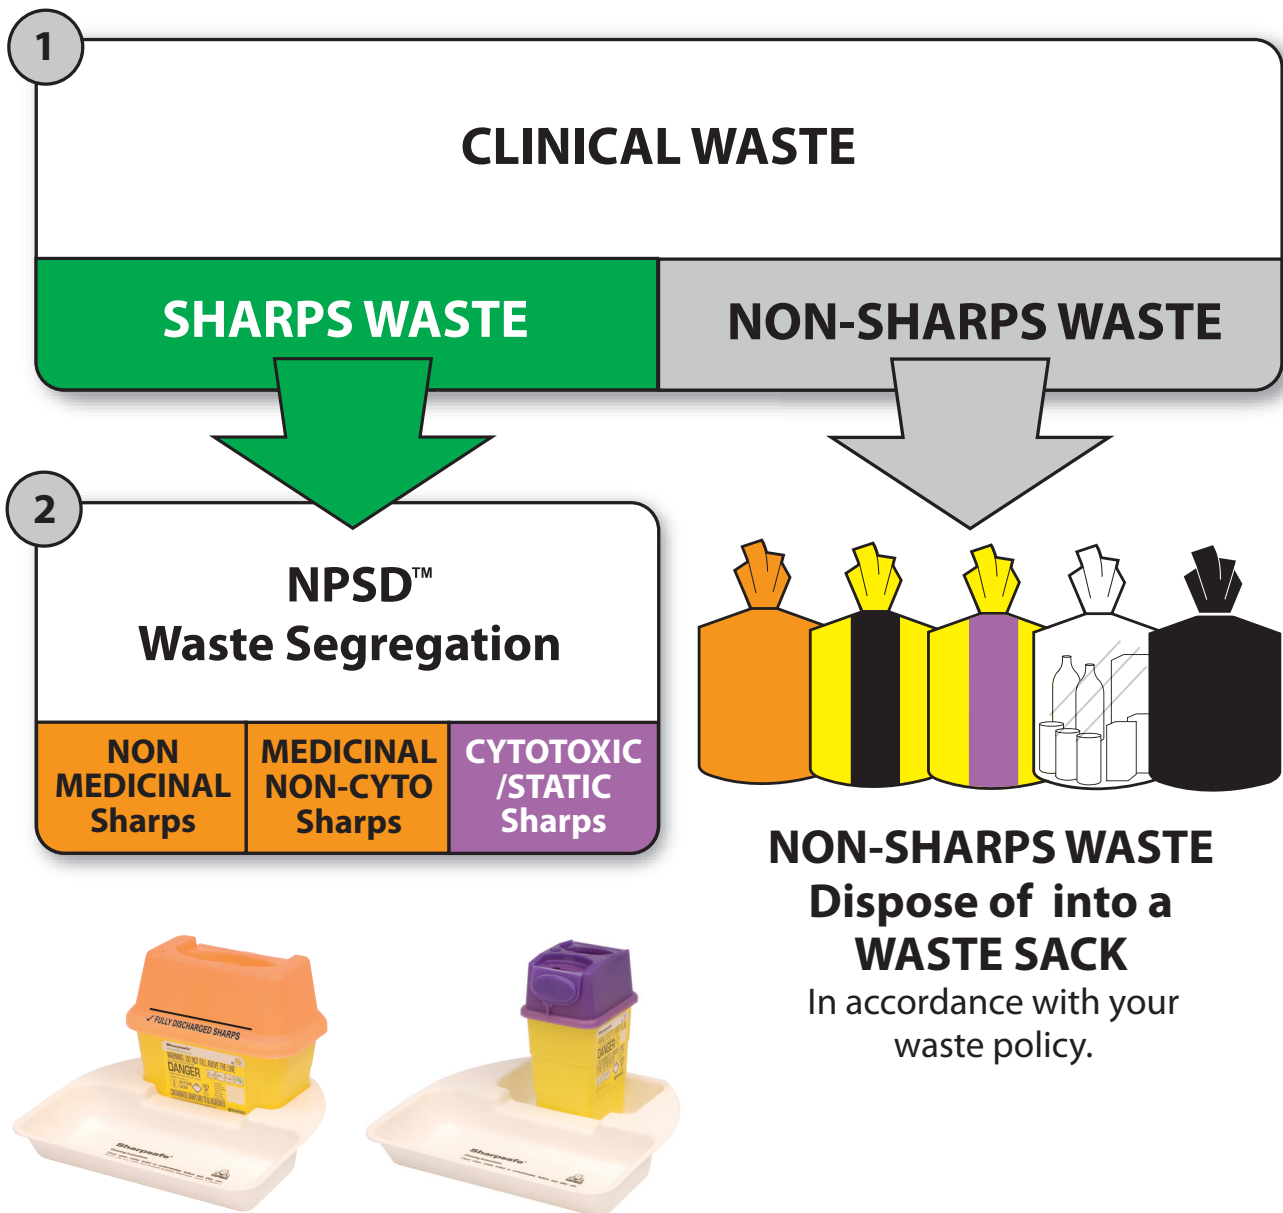

Point 1: Segregate Sharps & Non-Sharps Waste

Using Near Patient Sharps Disposal at the 'point of use' limits the amount of non-sharps waste being disposed of in a sharps container. Helping to reduce the cost of disposal.

Point 2: Segregate at the 'Point of Use'

Selecting the correctly coloured container and tray for the procedure, means that sharps waste can be safely segregate at the 'point of use'.

Helping to reduce needlestick injuries by unnecessary transportation of unsecured sharps.

Dispose of into an NPSD™ container at the 'Point of Use'

In accordance with your waste policy.
